

PCRB Glass to Sand

PCRB is initiating a glass to sand project to introduce glass recycling to Polk County.

This is intended to be a pilot project for a larger glass operation in the future.

Due to the small scale of this project, participation is limited to paid subscribers.

How it Works

Participants pay a one-time \$20 donation and are issued a 5-gallon bucket for glass. Only glass brought to the Recycling Center in a PCRB-issued bucket will be accepted.

A limited number of buckets are available.

Extra buckets may be available for \$20.

No canning jars, Pyrex or broken glass.

No bottles/jars over 1.5L or 4.5" wide.

A bucket holds 12 wine bottles.

Sign up at Recycling Center.
